

commander

Imagestore control on the desktop

With Commander, there's no need to visit the machine room to fix problems or adjust settings on your Miranda Imagestores. Commander is a network-based control and monitoring tool for the Imagestore range, and gives access to all their functions from any Windows computer. The intuitive user interface works alongside automation systems and existing control panels. Commander is ideal for tasks like graphics preparation and emergency on-air control. You can use Commander with any size of system, from a single channel up to hundreds. Commander works with all models of Imagestore and Intuition, from the old IS2 to the newest IS750 as well as the LGK-3901 and DSK-3901.

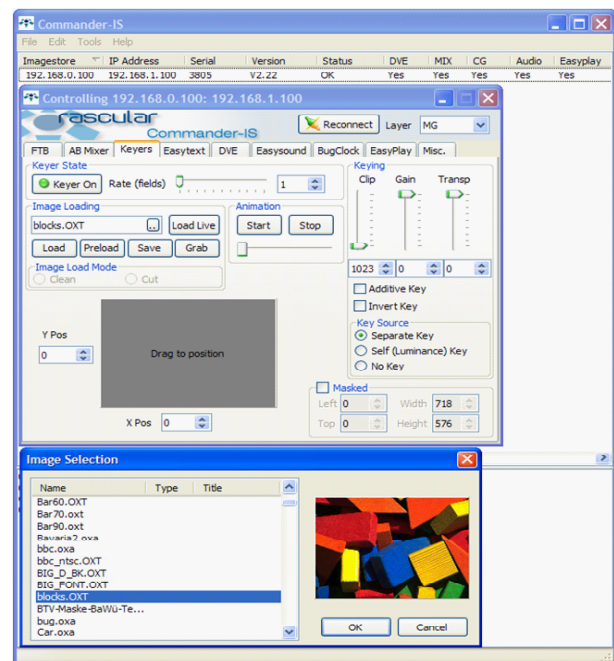

Applications

- Graphics preparation – comprehensive parameter adjustment
- On-air control - including audio metering and voice over
- Engineering checks and system configuration testing

Features

- Control over TCP/IP or RS-232/RS-422 ports
- Tally-based system follows device state, reflecting automation/control panel originated changes
- Audio metering
- Full EasySound configuration and control, including input shuffles, mutes, phase inverts and trims
- Thumbnailled media selection
- Easyplay audio files selection and playout
- Branding device network status and management
- Seamless operation with station automation
- Powerful user interface
- Monitoring and Control of Imagestore GPI inputs/outputs

Commander control panel
