

# mediant 2.0

## Branding Media Management

Mediant is the market leading media management system for the "Imagestore Series" branding devices from Miranda. Designed to handle legacy devices as well as the latest hardware, Mediant enables broadcasters to implement standard IT monitoring systems by monitoring device health and generating SNMP traps, as well providing Imagestore network monitoring for engineering staff. Mediant's scalability makes it easy to deploy in multi-user/multi-channel environments. Features such as Directory Mirroring and Backup/Restore further enhance system fault recovery and makes Mediant the branding media manager of choice in over 2000 channels in broadcast facilities around the world.

### Features

- Windows 2000, XP and Vista compatible
- Imagestore 1, 2, 3, 300, 750, Intuition and LGK-3901 compatible
- Automatic networked Imagestore and LGK-3901 detection
- Drag and drop media distribution
- Auto conversion of .TGA, .BMP, .TIFF, Quantel VPB, JPEG and JPEG 2000 files
- Supports all Oxtel Series media formats including audio, animations, Easytext, MPEG clips and fonts
- Background transfers and thumbnailing leaves Mediant user free to continue working
- Schedule Transfers - allows media transfers to be scheduled at network traffic off-peak times
- Hierarchical/logical grouping of Imagestores within network - Bay 1, 2, 3 etc...
- Imagestore Network Monitoring
- SNMP trap generation - Highlights network problems at a glance
- Windows shell extension allows OXT, TGA and VPB files thumbnailing directly on the desktop in Windows Vista/XP/2000
- Automatic Key Cropping on image conversion.
- Adjustable thumbnail sizes
- Backup and restore of all media/system files
- Directory Mirroring automatically copies files from/to networked devices
- Commander integration for media preparation
- Thumbnail cache of media held locally and shared across the Mediant user network
- File Timestamp integrity maintained throughout transfers
