

et-updater

Imagestore text delivery

ET-Updater is a powerful, yet simple solution to the problem of delivering text to the Miranda Imagestore Easytext CG systems in on-air environments. ET-Updater is easily configured to monitor text files in the local PC environment, and automatically transfer their contents to Imagestores via TCP/IP when changes are detected. The application runs on a standard Windows PC and is built using Rascular's reliable Imagestore API toolkit.

Example Applications

- News and Financial Tickers
- Weather Alerts
- School Closures
- Emergency Alert System

Features

- Control over TCP/IP or RS-232/RS-422 ports
- Full support for Miranda Imagestore "datasources"
- Unicode UTF-8 and ASCII file support with selectable code paging
- Seamless integration with station automation/control systems
- Data delivery via TCP/IP-based automation
- Scalable system Architecture
- Supports Windows 2000, XP and Vista
- "Text Picker" handles sequenced messages easily

Benefits

- Low cost of ownership
- 100% Windows compatible
- Integration with station automation
- Supports single/multi-channel installations
- Intuitive user interface
