Control for Miranda Imagestore 750

Miranda's latest addition to the Imagestore range, the Imagestore 750, can operate in both HD and SD modes, and offers four independent keyers. Helm controls all aspects of this device via ethernet, including new features such as the additional keyers and clean feed outputs.

Typical applications for Helm with Imagestore 750 include Master Control, Emergency Branding Control, live Quiz, Games and News channels, and multi-channel playout monitoring. Example panels showing Helm control of Imagestore 750 are available on our website at www.rascular.com.

Features - Helm can control all aspects of the Imagestore 750, including:

- All four Downstream Keyers
- Logo browsing and loading on all keyers
- DSK Load Live from both sources
- Dynamic tally monitoring
- Video AB Mixer
- Video Fade-to-black
- Audio AB Mixer
- Audio voiceovers

Special controls

Imagestore 750 can be used with the following special Helm controls for branding engines:

- Image Browser - For viewing and selection of logo by thumbnail image.
- Image Picker - For viewing and selection of logo by name from a 'drop-down' list
- Image Thumbnail - Displays dynamic thumbnail image of logo currently loaded onto any keying layer

Helm-IS750 Technical Information	
Compatibility	All current software versions of Imagestore 750 are supported, in both SD and HD modes. Helm-IS750 requires Helm software V2.32 or later.
Connection	Helm connects to Imagestore 750 units via Ethernet TCP/IP networking. All Imagestore 750's are fitted with Ethernet as standard, so no additional options are required.

Ordering information Requires Helm-PC-Designer/Helm-PC to operate see Helm data sheet for relevant application/drivers
